

Brainstorming & Idea Prioritization Template

Date	24 June 2026
Team ID	
Project Name	Human Development Index (HDI) Prediction System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Rohith Chitteti	Predict the Human Development Index (HDI) using Machine Learning based on socio-economic indicators.	Machine Learning	1
2	Daggavolu Ganesh	Use Life Expectancy, Mean Years of Schooling, GNI per Capita, and Internet Users as prediction features.	AI/ML	2
3	Gaddala Amrutha	Train and evaluate a Linear Regression model to accurately predict the HDI score.	Machine Learning	3
4	Yanamala Sreelekha	Save the trained Linear regression model using Pickle for deployment and future predictions.	Machine Learning	4
5	Rohith Chitteti	Develop a Flask-based web	Web Development	1

		application to allow users to enter indicators and predict HDI.		
6	Rohith Chitteti	Display the predicted HDI score and its development category (Low, Medium, High, Very High) through an interactive web interface.	Web Development	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Brainstorming & Idea Prioritization Template

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Develop a Flask-based Human Development Index (HDI) Prediction System with an interactive user interface.	High	High	1	Yes
2	Use Life Expectancy, Mean Years of Schooling, GNI per Capita, and Internet Users as input features for HDI prediction.	High	High	3	Yes

3	Train and evaluate a Linear Regression model to accurately predict the HDI score	High	High	2	Yes
4	Save the trained Linear regression model using Pickle for deployment and future predictions.	High	High	4	Yes
