

Demonstration of Proposed Features

Date	01 July 2026
Team ID	
Project Name	Human development index (HDI) Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Input Interface	Allows users to enter Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per Capita values.	Implemented	Yes	User-friendly web interface developed using Flask.
2	HDI Prediction	Predicts the Human Development Index category and score using the trained machine learning model.	Implemented	Yes	Accurate predictions generated from user inputs.
3	Data Validation	Validates user inputs before making predictions to prevent invalid or missing values.	Implemented	Yes	Input validation successfully integrated.
4	Data Visualization	Displays graphs and charts for HDI indicators and dataset analysis using Matplotlib and Seaborn.	Implemented	Yes	Visualizations help users understand the data.
5	Prediction Result Display	Shows the predicted HDI category and score with	Implemented	Yes	Results displayed

		clear output on the web application.			instantly after prediction.
6	Model Training & Evaluation	Trains and evaluates the machine learning model using the HDI dataset before deployment.	Implemented	Yes	Model achieved satisfactory prediction performance.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	100%
Overall Implementation Rate (%)	6
